

PARTIAL MCU sheet. 6 V/4 A servo buck (input ACT_BUS), MCU and supplies are other sheets.

SERVO_BUCK_EN = SERVO_PWR_REQ AND ACT_PERMIT_BUF; both pulled Low. E-stop also removes ACT_BUS.

Servo relax = rail off: digital servos may hold position without PWM pulses.

INA180A2 50 V/V x 10 mohm = 0.5 V/A; 6.6 A full scale at 3.3 V; RC 1k/10n to ADC2_IN5.

Firmware drives servo PWM Low before SERVO_PWR_REQ Low; 1k series limits back-feed.

Light bar: 8 addressable LEDs, firmware brightness cap <=0.5 W; F701 PTC MPN open.

A2 servo/light P0: servo buck and board ERC open; not a PCB release

Sheet: /
File: servo_light.kicad_sch

Title: UGV-MCU-01 A2 servo rail, servo headers and light bar
